Guided by science, inspired by babies.

Features:

- This unique and groundbreaking series was developed in consultation with Professor Anna Franklin from the Sussex Baby lab to ensure that designs and colours are chosen specifically for optimal visual perception for babies from 0 - 6 months.
- The new, smaller format makes them easier to travel with, more affordable and easier for little hands to grasp.
- These colourful and engaging books can stand by themselves - perfect for tummy time sessions! Relax side-by-side and point out the illustrations or lie on the other side and peek over the book.
- A great screen-free way to bond with a baby. They can be used on any flat surface, inside or outside.
- A multi-sensory experience for babies: sand varnish is textured and creates noise when scratched, foil elements catch the light and create reflections, raised bumps are easily felt and add details to the bold illustrations.
- The handy information page explains to parents and carers the educational principles behind these books and provides plenty of useful tips on how to use them.

This charming series has been specifically designed for babies. A great introduction to books through well-known nursery rhymes and interactive text. Singing songs and rhymes is the perfect way to bond with your baby and share quality time. It also aids language development by introducing them to the natural sounds and patterns of speech. Combining these with actions also stimulates the brain and helps muscle development.
